
This book is targeted for those who need to learn the marketing research process and basic data analysis techniques. This is the first book on the market that offers a software add-in ("XL Data Analyst(R)) designed specifically to use the power of Excel for "marketing research applications," a data analysis output that is exceptionally easy to understand. Basic descriptive statistics, differences through one-way ANOVA, cross-tabulation/Chi-square and Pearson Correlation, and simple and multiple regression are all comprehensively covered. Because it utilizes the popular Excel program, this is a must-use guide for all those involved in marketing research, statistical analysis, and report preparation.
